

SIMS Behaviour Health Check

Does the SIMS Behaviour Management module support your school's Behaviour Policy?

A new service is available that involves a 2 hour meeting with the member of staff responsible for Behaviour. Our Behaviour Management Consultant will review your setup and use of the software to ensure the module is being used to its full potential. A copy of your Behaviour Policy will be required in advance of the meeting.

This meeting is designed to review existing use of the module and provide general advice for improvement. It should not be used for consultation purposes or training.

Areas for review will include:

- Setup of the module
- Method of entering data (via Administration routes/Lesson Registers)
- Use of new functionality (Follow Up, Reviews, Interventions, Report Card Templates)
- Detention Management
- Conduct on the Homepage
- Reports used to summarise incidents and trends

A full report on current use of the module and suggestions for improvement will be provided following the Health Check meeting.
