

SITSS Data Recovery Service

SITSS Data Recovery Service can attempt to recover data that has been accidentally deleted or removed from a variety of different equipment.

Accidents do happen, files get deleted, drives get formatted, and USB pen drives get corrupted. SITSS Data Recover Service will do our best to recover your data safely and securely.

If data is deleted, formatted or corrupted, **please stop using the equipment immediately** as the data may get overwritten and have less chance of being recovered. If your equipment is damaged in any way we can attempt to recover your data and if required contact a third party to arrange a repair and data recovery.

Computer systems and laptops especially can often fail and make it difficult to recover the data from the internal hard disk drives, before re-installing your operating system you may consider our service to recover any required files before overwriting them.

If you require this service or would like more information about it please contact the School IT Systems Support Technical Service Desk on 01438 844777, Option 1 then Option 3 and they will be happy to assist.

An inspection fee of £62.00 applies, and in a majority of cases will include the recovery of the data. If the recovery is more complex a quotation will be supplied after inspection. Collection and delivery can be arranged for a £25 charge each way.
